SUMMARY

Experienced MERN developer with 2 years of expertise in building dynamic web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in creating scalable, high-performance solutions with a strong focus on clean code and best practices. Skilled in collaborating with cross-functional teams to deliver robust, user-friendly applications on time and within scope.

EXPERIENCE

System Engineer

Tata Consultancy Services

07/2022 Bangalore

- Designed responsive and dynamic components using React to improve user experience and functionality. Leveraged modern frontend technologies and libraries, including Tailwind CSS and Shadcn, to create a cohesive and visually appealing design.
- Collaborated with backend developers to integrate APIs, ensuring seamless data flow between frontend and backend systems. Integrated Stripe payment gateway on both frontend and backend.
- Implemented Content Security Policy (CSP) across the application to prevent cross-site scripting (XSS) and data injection attacks, resulting in a 98% customer satisfaction rate.
- Optimized application performance by caching API data using Redis, resulting in an 18% increase in API response speed.
- Designed and developed API endpoints for user authentication, account management, and transaction processing.

Web Developer intern

Tata Consultancy Services

01/2022 - 04/2022 Bangalore

- Developed foundational skills in React, component-based architecture, and state management while working on real-world projects and also assisted in designing and developing responsive and dynamic user interface components using React.
- Participated in debugging and performance optimization tasks using React Query, including API profiling and caching strategies, resulting in a 16% increase in response time efficiency.

Personal Project

Food-Ordering Website

- Crafted a single-page application using React.js, Node.js, Express.js, and MongoDB to facilitate an end-to-end food ordering system.
- Implemented authentication and authorization, restaurant and menu management, search, filtering, sorting, checkout, order summary, Stripe payment gateways, and order tracking.
- Implemented real-time notification for order updates using WebHook.

Ecommerce Website

- Developed an e-commerce website using React, Node.js, Express.js, and MongoDB. Implemented features including authorization and authentication with Auth0, product management, shopping cart, checkout, filtering, searching, various categories, similar products, PayPal payment gateways, an admin panel for managing orders, and real-time order updates.

EDUCATION

B.tech in Computer Science & Engineering

Institute Of Engineer and Management

08/2018 - 06/2022 Kolkata

- Kolkata, India

SKILLS

Technical Skills :

Data Structures and Algorithms | Javascript | React.js | Express.js | Next.js | Shadcn | Typescript | Git | Node.js | Docker | HTML5 | CSS3 | Tailwind CSS | RESTful Web Services | Prisma ORM | MongoDB | Redis.

Tools & Platforms :

GitHub | MongoDB Atlas | VS Code | Postman | Docker Desktop
